

These are some ideas to support your child at home to help with their learning in Health and Social Care. If you need further information please discuss with your child's teacher.

### **Learning Tips for Parents – Health and Social Care**

- Ensure students have their folders up to date with work in sections and in poly pockets.
- Ensure students have a note book and black pens for lessons.
- Discuss issues and news topics regarding –  
Health / The National Health Service (NHS) / Social Care / Children's Welfare / Care of the Elderly  
so students have different viewpoints and experiences to call upon for their writing.

### **You can use the media to engage your child's interest**

- Watch "the soaps" and medical dramas, Panorama, etc and discuss the issues raised:
  - Are they true to life?
  - How do they compare to own experiences / how would "you" resolve the situation
